

Cross Country Tour

Lesson 17 Answer Sheet

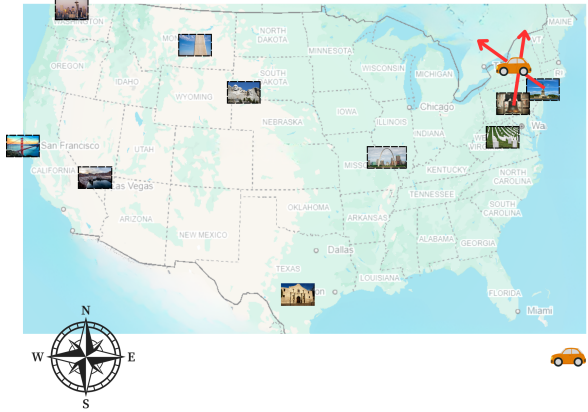

Name: Answer Guide

Date: _____

1

Everyone will have the same starting point, given below. Once you find your travel points, place your cut-out car on the intersection of the two lines. After locating your starting point, have your teacher check your location and ask for the next bearing clue. Once you triangulate each travel point and move your car, you must have your teacher check your route, and if you are ready to move on, they will provide your next bearing clue.

Record your bearing clues below to refer back to them if you don't draw the correct lines. Orient Ari to the compass provided with the map of the United States and set Ari to the **On a Map** setting.

Bearing Clues	Triangulated Path
Start Location: - Draw a line N40° W from the Statue of Liberty - Draw a line N10° E from the Liberty Bell	
Travel Point #2: - Draw a line N110° W from the Liberty Bell - Draw a line N40° W from the Arlington National Cemetery
