

Name: _____

Calibrate

Ozobot Map – Economic Resources

1. Determine a chain of resources that are connected (a natural resource used to make a capital resource; and then how the capital resource is used for the human resource's job)
2. Code each resource with a "special move" Ozocode.
3. Run your ozobot along your maps to demonstrate the connection of the resources.
4. Program a second chain of resources and run your ozobot again.
