

The sun heats the ocean. Water

_____ and rises into the air.

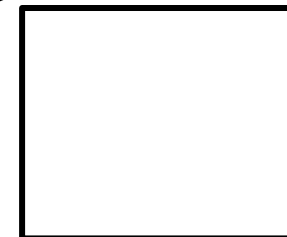

The water vapor cools and

_____ to become droplets, which forms clouds.

If enough water _____, The drops become heavy enough to fall to the ground as

_____ and _____.

The Water Cycle

First fill in the missing words on the line. Next label each cycle and draw a picture in the box to show that stage.

Place your Ozobot on the track to map the cycle of water.

Word Bank:

Collects
Rain
Condenses
Evaporates
Condenses
Snow

Some rain _____ in groundwells.

The rest flows through rivers back into the ocean.
