

The sun heats the ocean. Water **EVAPORATES** and rises into the air.

A picture of the sun

The water vapor cools and **CONDENSES** to become droplets, which forms clouds.

Sun with clouds or just clouds

The Water Cycle

First fill in the missing words on the line. Next label each cycle and draw a picture in the box to show that stage.

Place your Ozobot on the track to map the cycle of water.

Word Bank:

Collects
Rain
Condenses
Evaporates
Condenses
Snow

If enough water **CONDENSES**, The drops become heavy enough to fall to the ground as

RAIN and **SNOW**.

Clouds with rain or snow

Some rain **COLLECTS** in groundwells. The rest flows through rivers back into the ocean.

Ocean, rivers or rain collecting in an area
