

Ozobot Underground Railroad Rubric

	Exceeds 4 points	Mastered 3 points	Progressing 2 points	Below 1 point
Group Work	Exceeds The group is a true team: celebrating their diverse strengths and finding ways to compliment each other. All participants went above and beyond their job. Team members enthusiastically planned together and comfortably communicated and critiqued each other. Modifications/ revisions/ improvements were encouraged and celebrated.	Mastered The group works together. Leaders and followers were evident throughout the project. All participants did their part. Planning and communication between team members was respectful and clear. Multiple modifications/ revisions/ improvements were made throughout the project.	Progressing The group has leaders and followers. Some team members did their part. Planning was attempted and followed with some success. Communication between team members was evident. At least 2 modifications/ revisions/ improvements were made throughout the project.	Below The group has very little leadership or followers. Group members are working independently. Little planning was done. Communication between team members was forced and required multiple interventions by adults. Only 1 or no modifications/ revisions/ improvements were made throughout the project.
Creativity & Presentation	Exceeds The project demonstrates depth of understanding and all design elements support the purpose. The project is a work of art.	Mastered The project is complete and shows a purpose. Decorations mostly support the purpose. The projects is a large polished, final draft.	Progressing The project is complete and shows a purpose but lacked decoration or the decorations do not support the purpose. The project is crowded. Effort was made to have a polished product.	Below The project does not show purpose and is incomplete. The project is messy and small.
History	Exceeds All elements of the project seamlessly integrate together computer science with the history of the Underground Railroad. There is evidence of a depth of understanding of key points/content standards.	Mastered Clear effort was made to integrate the Ozobot's behavior and the decoration to the history of the Underground Railroad. The project shows evidence of understanding all key points/content standards.	Progressing There is evidence of at least some effort to connect the Ozobot's behavior to the history of the Underground Railroad.	Below The project demonstrates no connection of the Ozobot to the Underground Railroad history.
Computer Science	Exceeds The project is a showcase exemplar for integrated Computer Science. The Ozobot successfully demonstrates 10 or more codes and follows the track reliably.	Mastered The project is complete. The Ozobot successfully demonstrates 7 or more codes. The Ozobot can successfully follow the track.	Progressing The project is complete but the Ozobot successfully demonstrates 6 or few codes. The Ozobot intermittently follows the track.	Below The project is incomplete. The Ozobot successfully demonstrates 3 or fewer codes. The Ozobot cannot follow the track.
